

I am surprised that Sinclair Broadcasting can force their stations to air a slanted political piece so close to an election. Is this what we fight for when we brag about free speech. I was worried when the bill went through the congress to allow even more media consolidation. I will work hard to remove from office those that threaten our democracy by trying to control the media. But that is your job. Why aren't you doing it.

The free public airwaves should serve all of the people and should serve the public interest. I have wondered how the false advertising of Fox news can go forward without challenge. Now this. Obviously you folks have lost sight of the need to protect the objectivity of our airwaves regarding news and political fairness. I hope we can change this.
